Artepassante shop windows into Garibaldi Station Milan

Opening on October 3, 2019 - 18:30 p.m. - until October 4 to December 31, 2019

Francesca Vitali Boldini writes:

“The exhibition project LANDSCAPES, involving 33 international artists from institutions, associations and academies, who aims to bring to light in the underground spaces of the Porta Garibaldi Station – railway passer-by - a living and artistic reality.

This operation consists in the restoration of the seventeen windows placed inside the suburban station, redefining them as small galleries to form a large exhibition space, with the purpose of presenting ideas and ideas of the contemporary.

The multiple artistic languages presented by the exhibition interact with each other and with the surrounding space, sometimes metaphysical and running for the last train of the night, other times more animated and full of passers-by in

the early hours of the day.

The desired effect is the renewal of the imposing scene of the underground station, so that you can perceive the presence of art in it and be aware that these seventeen displays are animated by the ambition to change the atmosphere, from static to museum/metropolitan context, usable by each individual passer.

The importance of this operation also lies in promoting the cultural exchange that will take place between exhibiting artists and the reality of Milanese artists.”

The exhibition is part of the Underpass project coordinated by Silvia Biondo e Francesca Vitali Boldini.

Artists are:

Astrid Albers - Germany

Laura Arevalo Dominguez - Spain
